**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Warmuth II.

Re claims 1-18, Warmuth, II discloses an air spring comprising a retainer (12), a base housing (14), an elastomeric sleeve (18) secured to the retainer at a first end and secured to the base housing at a lower end to form a chamber (22), the elastomeric sleeve expanding from a retracted condition into an expanded condition, the air spring being characterized by: a confined bladder (16) within the chamber and defining a bladder chamber, the bladder chamber expanding from a collapsed condition to an inflated condition to displace at least a portion of an expanded volume within the sleeve chamber and adjust the spring rate of the air spring in the expanded sleeve condition.

***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Oishi, Berg, and Levy et al., teach air springs comprising a retainer, a base housing, an elastomeric sleeve secured to the retainer at a first end and secured

to the base housing at a lower end to form a chamber, the elastomeric sleeve expanding from a retracted condition into an expanded condition, the air spring being characterized by a confined bladder.
